Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. Figure 13 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.
2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1-4 are rejected under 35 U.S.C. 102(e) as being anticipated by Brown et al. These claims are anticipated by Figure 11 of Brown et al. Note that Brown et al claims priority to Provisional application Serial No. 60/191,658, filed March 23, 2000. Provisional application Serial No. 60/191,658 discloses the subject matter of Figure 11 of Brown et al. Therefore, the effective filing date of Brown et al is March 23, 2000. Note column 5, lines 51-53 of Brown et al for the disclosure that the valve housing is of greater fuel vapor impermeability. Regarding claim 4, the tapered portion between ribs 202 of Figure 11 of Brown et al is read as an "umbrella-shaped" portion.
4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the

Art Unit: 3753

invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claim 5 is rejected under 35 U.S.C. 103(a) as being unpatentable over Brown et al in view of the acknowledged prior art of Figure 13 herein. Claim 5 is considered met by Figure 11 of Brown et al except for the specific materials specified. It would have been obvious in view of the acknowledged prior art of Figure 13 herein to utilize a modified olefinic resin containing a polar functional group and polyamide or polyacetal as the materials for the device of Figure 11 of Brown et al since such materials are well known for a fuel tank environment.

6. Claims 1-4 are further rejected under 35 U.S.C. 102(e) as being anticipated by Aoki et al. These claims are anticipated by Figure 7 of Aoki et al. Even though the U.S. filing date of Aoki et al is after the priority date claimed, applicants have not submitted a certified translation of the priority document. Regarding claim 4, the curved portion of top 51B of Figure 7 of Aoki et al adjacent the end of the lead line for numeral 51B is read as an "umbrella-shaped" portion.

7. Applicant cannot rely upon the foreign priority papers to overcome this rejection because a translation of said papers has not been made of record in accordance with 37 CFR 1.55. See MPEP § 201.15.

8. Claim 5 is further rejected under 35 U.S.C. 103(a) as being unpatentable over Aoki et al in view of the acknowledged prior art of Figure 13 herein. Claim 5 is considered met by Figure 7 of Aoki et al except for the specified materials claimed. It would have been obvious in view of the acknowledged prior art of Figure 13 herein to utilize a modified olefinic resin containing a polar functional group and polyamide or

Art Unit: 3753

polyacetal as the materials for the device of Figure 7 of Aoki et al since such materials are well known for a fuel tank environment.

9. Claims 12-14 and 21-23 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made **without** traverse in Paper No. 15.

10. Claims 6-11 and 15-20 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention. Election was made **without** traverse in Paper No. 13.
